

NEW SOUTH WALES.

MONTHLY SUMMARY OF BUSINESS STATISTICS.

No. 25. MAY 24, 1933.

Issued by T. Waites, Government Statistician.

INDEX OF WHOLESALE PRICES (SYDNEY).

Average for year 1911 = 100.

All prices are in Australian currency. The indexes for recent months are shown in table 24 on page 11 of this summary. The footnotes to that table apply also to this graph.

N.—Northern; S.—Southern; C.—Central; W.—Western; T.—Total, all districts.

In the past six months the rainfall has been patchy in character. Dry conditions exist over the greater part of the sheep and wheat districts. Wheat sowing has been retarded. Conditions in the dairying districts have improved.

2. WOOL.

It is anticipated that the total production of wool for 1932-33 will be approximately 517,000,000 lb. as compared with 503,210,000 lb. in 1931-32. Excellent clearances have been made at auctions.

3. WHEAT.

The area sown with wheat for 1932-33 was 4,702,500 acres, including 4,388,700 acres for grain. The quantity of new season's wheat despatched or awaiting despatch from country stations of New South Wales Government Railways was 65,330,000 bushels as at 6th May, 1933. This quantity may include a certain amount handled twice. It is estimated that the total crop harvested in the State is in the vicinity of 77,000,000 bushels.

On 13th May, 1933, the quantity of new season's wheat grain stored in silos and on railway premises was 22,287,000 bushels. Of this quantity, 6,516,000 bushels were on sites in the Metropolitan Area. Stocks of grain and flour as at the end of November, 1932, were equivalent to 2,640,000 bushels of wheat as compared with 5,453,000 a year previously.

The course of wheat prices is shown in Table 24.

4. BUTTER.

The production of butter in 1931-32 reached a record total, which appears likely to be exceeded in the current season.

* Adjusted by elimination of abnormal transactions on account of Governments.

† Unadjusted on account of amalgamation.

‡ Adjusted on account of amalgamation—Subject to revision.

§ State Government banking transactions suspended. Index not ascertainable.

Inter-bank clearings are regarded as an approximate measure of changes in the general volume of business transactions provided they are considered in conjunction with changes in price levels.

The index represents the ratio of each month's clearings to the average for the month concerned during the five years 1926–1930. This average is represented by 1,000 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

No adjustment has been made for normal growth or change of price levels.

1933	946,729	656,882	4,452,054	2,848,769

The decrease is partly due to a lower level of values. Comparative figures for individual months are shown in Table 46 of the Statistical Bulletin of New South Wales for March quarter, 1933.

1932	...	31·8	33·2	33·0	31·9
1933	...	30·2

The above figures are compiled by the Commonwealth Statistician from returns supplied by Trade Unions, and represent the proportion of unemployed members to total membership in unions reporting.

AGGREGATE AMOUNT OF WAGES PAID AND INDEX OF EMPLOYMENT.

Data under these headings are now being compiled. Progress tabulations, including nearly 100 of the larger factories, indicate that there were 40,157 employees on the pay sheets in the middle week of March, 1933, compared with 35,435 in the corresponding week of 1932. The increase occurred mainly in the iron, steel, engineering, and clothing trades. The volume of employment in retail trades is indicated in Table 10. According to returns collected by the Department of Labour, the numbers employed directly by Government Departments (including Local Government) on relief works in the last week of March, 1933, were 18,183. In addition, considerable numbers were employed by private employers from advances made by the Unemployment Relief Council.

22. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. It represents the ratio of the average prices of ordinary shares to their par values.

Par Value of Shares = 100.
